£19.95

- The book is geared toward architects, and architecture, design, and art students
- Relevant to architecture and art bookstores, university bookstores and libraries
- This book presents two new Plan:b projects not yet published in books (Antejardin office building and Click Clack Hotel in Medellín)

In this book, we review a set of Plan:b projects in Colombia through the environmental, social, and voluntary constraints we faced, and the interim agreements we built around them. We carry out a reconstruction of the central facts behind these buildings through an “inverse” exercise — explaining each project based on contextual constraints and not on singular architectural ideas. We review the work of other authors and the way they understand limitations and difficulties that are part of their creative activity and attempt to generate a broad reflective base to approach our architectural projects and the predominant role that restrictions have played in them.

Felipe Mesa is an architect at the Universidad Pontificia Bolivariana, in Colombia. He holds an M.Arch from the Universidad Polit cnica de Catalunya (ETSAB) in Spain. Felipe is founder partner and principal at Plan:b architects, a firm based in Medelli n, Colombia. He is an assistant professor at the Arizona State University, Herberger Institute for Design and the Arts, the Design School.

Federico Mesa is an architect at the Universidad Pontificia Bolivariana, Colombia. He holds an M. Arch from the Universidad Pontificia Bolivariana (UPB), Colombia and is Partner and Principal at Plan:b architects, firm based in Medelli n, Colombia. Federico is an assistant professor at the Universidad Pontificia Bolivariana, Facultad de Arquitectura, Colombia.
