Hugo Alcol spent a long time on the music scene before being commissioned to photograph exclusive events and parties. His photos capture more than just the ‘look’ – they capture the mental state of his subjects, and the atmosphere of the party.

“This enigmatic book is both a puzzle and a delight at the same time. As the photos show anything from a Spanish social event, to a weird woman with a rabbit and a dead rat floating upside down in a green pool. Although difficult to quite see what is going on, we are constantly drawn back in to try and understand the narrative and we are wanting to come back for another view. It gets under our skin, and that is a rare attribute.” – Martin Parr, Magnum Photos
