Price	£65.00

- This monograph of works is dedicated to artist Arne Quinze
- Featuring installations in New York, Shanghai, London

A firm believer in the positive influence art has on humanity, Arne Quinze pursues his ongoing quest for the ideal society, where every individual communicates and interacts in balance with their environment. His many works, which mix together different forms and materials, create a place where the world meets art, helping us so that we, too, can find the way to successful and sustainable social cohesion.

From blueprints to construction, from models to architectural surveys, immerse yourself in the powerful creative process of this international artist, as he invests in public spaces: in New York, Shanghai, London, São Paulo, Brussels - and most recently in Liège, in front of the Hôtel de Bocholtz, where Natural Chaos challenges us.

Text in English and French.
