- Axel Enthoven demonstrates that statements, sloganesque formulations, cutting corners, taking an obtuse attitude to people are not his thing
- Day after day he proves that elegance still exist

Designed by Axel Enthoven. Day after day he proves that elegance still exists. He demonstrates that statements, sloganesque formulations, cutting corners, taking an obtuse attitude to people are not his thing. That kindness is not synonymous with weakness. That taking the time to think things through properly should not be the exception. Taking responsibility for the impact of actions and words is not a rare occurrence. Striving after timelessness and sustainability is given a lasting interpretation. For him, combining aesthetics and functionality is a matter of course.

Thanks to Axel Enthoven we are reminded that things can be different. And how important design is.
