- This book is a serious consideration of the Chinese government's "Beautiful China" policy and what it means for the design professions in contemporary China

Beautiful China is the title of the Chinese government's broad policy to ensure the traditions and aesthetics of Chinese culture not only survive as heritage but apply to contemporary society and to the future. Beautiful China is also nested within the larger policy concept of creating an 'ecological civilization'. Applied to a nation of over 1.3 billion people and the second most powerful economy in the world, these policies are arguably the most fascinating socio-political experiment taking place anywhere in the world today. This book is the first serious consideration of this policy and what it means for the design professions in contemporary China.

Text in English and Chinese.

Richard J. Weller is the Meyerson Chair of Urbanism, professor, and chair of Landscape Architecture, and co-director of the McHarg Center at the University of Pennsylvania.

Tatum L. Hands, PhD is the editor in chief of the *LA+ Interdisciplinary Journal of Landscape Architecture*, University of Pennsylvania.
