

Building Green Futures

Mario Cucinella Architects
Edited by Anna Mainoli

ISBN	9788855210263
Publisher	Forma Edizioni
Binding	Hardback
Territory	World
Size	300 mm x 240 mm
Pages	240 Pages
Illustrations	100 color, 30 b&w
Price	£66.00

- Mario Cucinella curated the Italian Pavilion 'Archipelago Italia' at the 16th Architectural Biennale of Venice in 2018
- Mario Cucinella Architects was founded in 1992, and is a world leader in crafting sustainable architectural solutions for a wide variety of building uses

This book brings together a collection of recent projects and classic architectural designs by Mario Cucinella Architects, and explores the sensitive, creative, and sustainable solutions that architecture and nature can provide in answer to global challenges. The way forward is approached via constructive strategies of the past and from the plant world, looking at how man has adapted in every latitude, climate, and culture. Buildings of the past considered resources like wind, sun, rain, and local materials, sustainable strategies that are increasingly important today. Research in the plant world inspires buildings that can adapt to the climate and resonate with the environment. Each project featured here is accompanied by a wealth of illustrations and drawings, and an in-depth analysis that interprets all aspects of construction.

Anna Mainoli is a consultant, editor and curator of cultural events. She edited the book, *The Design City. Milan, Extraordinary Lab*, with Marco Sammiceli for Forma Edizioni and the Salone del Mobile. She is co-editor of the *Corriere della Sera* series of monographs *Lezioni di Architettura e Design* and *Architetture e interni urbani* - in collaboration with Politecnico University in Milan. She has edited numerous publications dedicated to architecture and design, as well as a number of monographs.
