• Clara Brörmann's monograph explores the question: What can an abstract image be?

- The artist develops paintings in different formats canvas as landscape, as symbol, as figure
- Text in English and German

What can an abstract image be? Starting with this question, Clara Brörmann (*1982) develops paintings in different formats – canvas as landscape, as symbol, as figure. Her works are not two-dimensional, but have a body and can be viewed from various perspectives. The catalogue *Kopfbilder* begins with her relatively recent series of head paintings. Brörmann's painting is characterised by her processual work method and a vivid materiality.

Text in English and German.
