Eco-Friendly Building Facade

Juan Li

ISBN	9789881468772
Publisher	Artpower International
Binding	Hardback
Territory	World
Size	290 mm x 235 mm
Pages	288 Pages
Illustrations	400 colour, b&w
Price	£38.00

- *Eco-friendly Building Facade* features a wide range of projects which consider the environmental elements of building design

In architecture, a facade is the skin of a building. *Eco-Friendly Building Facade* demonstrates just how important this 'skin' is by illustrating its impact on energy efficiency. Sunlight, ventilation, low energy, noise minimisation, rainwater harvest, prefabricated components, flexibility, etc., all the environmental elements are taken into consideration in the design process and are illustrated here with sufficiently detailed images, drawings and articles.
