Price	£33.75

- Research on the theme of energy by the Chair of Gion A. Caminada
- Structured into 12 sections.

This publication impressively summarises the underlying research on the theme of energy by the Chair of Gion A. Caminada. Structured into 12 sections, it investigates the fundamentals of shaping space: form, geometry, material and construction – based on prominent examples in architectural history and a number of buildings by Caminada. Countless phenomena and rules of structural physics are also described in simple, clear terms.
