A slower pace of life, outdoor space and tight-knit communities come hand-in-hand with village living – something many have come to appreciate in recent months. Many city-dwellers are looking for an alternative way of life and are preparing to move, making the dream reality. In this beautifully photographed book, Ben Ashby, the editor-in-chief of *Folk Magazine*, reflects on the authenticity and charm of life on the farm. Having made the move several years ago from New York to Kentucky, he shares his thoughts on fitting into a small town, living on the farm, learning to celebrate the slow life, and being self-sufficient. For each season, he pilots us to the most inspiring farmhouses and pays tribute to the architecture and interiors of these unique spaces, as well as to the lifestyle and sense of community that goes along with country life. Now might be a perfect time for you to give farming life a try!

Ben Ashby is co-founder, photographer and editor-in-chief of *Folk magazine*. He lives in Kentucky.
