Expos as Great Urban Projects

Present and Future

Dinliang Yang

Joan Busquets

Michael Keller

ISBN	9781957183220
Publisher	ORO Editions
Binding	Hardback
Territory	World excluding USA, Canada, Australasia, China, Hong Kong, Taiwan, South Korea, and Japan
Size	296 mm x 210 mm
Pages	1296 Pages
Illustrations	800 color
Price	£95.00

- This book is about the design process of a specific type of mega-event, the World Expo, and its urbanistic consequences in the mid-term
- With endorsements from the general secretary of Bureau international des expositions and the Dean of Harvard University Graduate School of Design

Expos as Great Urban Projects: Present and Future is an outcome of a multiyear design research project that has been conducted at the Harvard University Graduate School of Design in collaboration with the Bureau International des Expositions (BIE) since 2018. The overall research has been led by Professor Joan Busquets, with Dingliang Yang and Michael Keller as co-principal investigators.

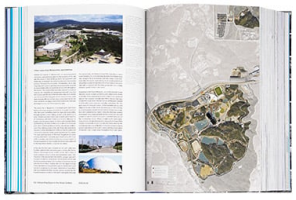

The research and publication explore the capacity of World Expositions as mega-event strategies in transforming and creating new conditions for urban development, and retrospectively reviews the innovative ideas on urbanism and architecture in Expos and examines future design strategies.

The overall research is framed under the title “Expos as Great Urban Projects, Present and Future,” and the outcome is correspondingly organised in two volumes: Volume 1: *Understanding Expos in an Urbanizing World*, condense two parts: the urbanistic impact of expositions at the scale of the metropolis or territory and the catalog for Interpreting Expos in the Urban Context, that explores the design and legacy impact of expositions at the scale of the site and immediate locality. Volume 2: *Learning from World Expositions*, opens comparative studies of main Expos urbanistic features and conclusional analysis on the design of future expos.

Joan Busquets is a world-renowned architect, urban designer, and educator. He is the Martin Bucksbaum Professor in Practice of Urban Planning and Design at the Harvard University Graduate School of Design, and the founder of the design firm, BAU Barcelona. **Dingliang Yang** is an instructor of urban design at Harvard University Graduate School of Design. He is the founding partner of VARI Design. **Michael Keller** is a research associate at the Harvard University Graduate School of Design with a background in architecture and landscape architecture.
