Price	£6.99

- Outlines Galileo's life and main achievements told to the reader as a first-person account
- A timeline at the end of the book lists the main biographical events and some simple questions will help children to further understand and test their knowledge

Meet Galileo Galilei and discover the story of his life and work in this engagingly illustrated biography – narrated by the scientist himself. Astronomer, physicist, and philosopher Galileo Galilei was referred to as “The Father of Modern Science,” because of his groundbreaking research. Making observations about nature, and using mathematics to back them up, he proved the Copernican Theory true: the Sun, not the Earth, is the centre of the universe. Join Galileo on his pioneering journey to see why his work had such long-lasting implications, and why the Catholic Church even condemned him for heresy. Ages: 6 plus

Jane Kent is a writer and editor with over 15 years' experience. After studying publishing at Oxford Brookes University, she worked for some of the UK's top publishers before becoming a freelancer at JVK Creative. She works on both children's and licensed book and magazine projects. **Isabel Munoz** is a very happy and enthusiastic illustrator, raised in a small town in the north of Spain. Painting was her favourite hobby as a child, so when the time came it only made sense to study Fine Arts at university. Today, after lots of hard work and many filled sketchbooks, Isabel's proud to say illustration has become her dream job.
