- Features 44 spectacular ideas for creative garage design
- New technologies and innovative solutions
- Insightful interviews with passionate car enthusiasts

Houses and Cars is a must-have for car enthusiasts and lovers of spectacular architecture. Featuring around 44 innovative projects, this book showcases how to present your four-wheeled companion – or even an entire collection – with the attention it deserves. Here, cars aren't simply parked. Instead, they are housed in architecturally striking spaces designed to give them a dedicated place within the fabric of everyday life. Each project is presented with breathtaking photography and clear architectural plans. Interviews with passionate car collectors and fascinating facts complete this exceptional volume.

Andreas K. Vetter is Professor of Art and Cultural History at TH OWL in Detmold. With his keen eye for innovative architecture, he has curated some of the most exciting international examples. His previous successful publications with Callwey include *Townhouses*, *The Best Concrete Houses*, and most recently *Best Workspaces*.
