<b>Illustrations</b>	200 color
<b>Price</b>	£30.00

- Explores the evolving plans of architectural work undertaken over the last 35 years

*Jigsaw City* explores the phenomenon of growth in Asia through the lens AECOM's work to create new urban settlements of many types at many scales. From India, to China, to the Philippines, the developments explored include regional infrastructure corridors, transit-oriented city extensions, downtown redevelopments, new communities, mixed-use open space districts, environmental conservation frameworks and ecological restorations. On display are the efforts of strategic planners, environmental and ecological planners, masterplanners, urban designers, landscape architects, and civil engineering to deliver the places and infrastructure needed by rapidly growing populations and economies. At stake is quality of life for millions of people, the rise of a new Asian middle class, and the question of whether frenetic growth can be brought into balance with natural systems already strained to the breaking point.

With her experience spanning twelve years, Claire Saeki is recognized as an expert in writing, editing, and consulting for industries that make up the built environment in Asia. She has launched, managed, edited, and written for magazines in market sectors within the built environment, including urban planning, architecture, interior design, real estate, green building, construction, and engineering. In these and other sectors, she produces numerous conferences and managed award programs. As the co-founder and publisher of "RFP Magazine"(Real Estate, Facilities, Projects), Claire is currently recognized as an authority and innovator within the industry.
