Territory	World excluding Belgium and the Netherlands
Size	300 mm x 300 mm
Pages	240 Pages
Illustrations	280 color, 8 b&w
Price	£55.00

- Bart Lens and his team Lens°Ass show how the direction they have chosen can lead to fascinating projects
- The book presents a wide variety of projects: new constructions, remodelling assignments, interior designs, even objects such as furniture and lamps

Seven years after his first book, Bart Lens and his team Lens°Ass show how the direction they have chosen can lead to fascinating projects. The formulation of a clear and precise concept forms the basis of every single design. A concious choice of materials and elaborated detailing bring forth creations that express tranquility and serenity. The clear line-work emphasises the pure emotions that originate in the union of design and light. The great care that goes into the elaboration of the interior in all its facets is a constant preoccupation for Les°Ass. The book presents a wide variety of projects: new constructions, remodelling assignments, interior designs, even objects such as furniture and lamps. The introduction of a basic idea, a theme, forms the foundation of every project, no matter what its scale might be. This same vision is also the starting point for the recent large-scale architectural projects.

Text in English and Dutch.
