Size	108 mm x 108 mm
Pages	600 Pages
Illustrations	600 color
Price	£19.95

- Condensed thoughts transformed to matter with sequence of drawings
- With exceptions of the author's other books, no similar published case studies exist
- Uniquely relevant in both the education and practice architecture

This book aims to unify knowing and feeling with drawing. Since this process is influenced by the memory of our body, the outcome could be unpredictable, mysterious and timeless. If the drawn investigation questions the fundamentals of knowledge, existence and truth, then the resulting architecture might embody a new branch of philosophy. It will affect simultaneously our cerebral, tactile, and spatial perceptions and appear as a circumstantial singularity.

Dr. Peter Magyar, a registered chief-architect in Hungary and in Europe, came to K-State from Florida Atlantic University in Fort Lauderdale where he was the founding director of the School of Architecture from 1996 to 2007. His MArch of Architecture and Urban Design and Dr. of Architecture degrees (both with distinction) are issued by the Technical University of Budapest. In 2011 he was distinguished with the Medal of Pro Architectura Hungarica; in 2015 he was elected as member of the Hungarian Academy of Arts and letters; and in 2016, he became Fellow of the Royal Institute of British Architects. **ADDITIONAL CONTRIBUTORS:** Adriana Molina Robert McCarter Dr. Kendra Schank Smith Dr. Gyorgy Szego
