- Learn about the natural world through fairy tales!
- Charming characters on 20 adventures teach kids about the wonders of nature through story

Children will learn about the natural world through fairy tales in *Little Stories from Nature*. Learn about the water cycle by following a snowflake on its fantastical journey, or about hibernation through the adventures of a food-gathering squirrel. While no didactic explanations are provided, these marvellous fairy tales and engaging illustrations teach kids about the real wonders of nature. For bedtime, class time, or playtime, these stories stimulate the imagination while setting the building blocks for understanding the world around us. Ages 5+

Francesa Sudano, is a freelancer artist with experience in the animation and publishing industries. In the former her specialties are visual development, background design, and 2D animation. As a children's book illustrator, she focuses on storytelling, educational books, animals and nature. **Altea Villa** is a content and ghost writer with a doctorate in philosophy. Villa has authored numerous magazine articles and children's books.
