*"This is a celebration of slow interiors that evolve over time, rather than interiors designed and meticulous, using just the latest fads."*— **Enki Magazine**

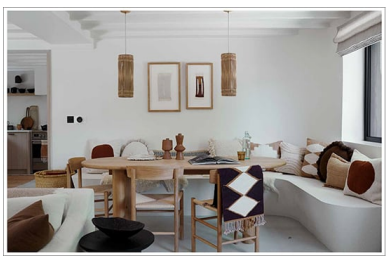

*"…full of ideas for anyone who wants to foster a slower pace of life at home—especially in the kitchen. The cooking zones featured in its pages aren't your typical modern farmhouse kitchens with subway tile–clad backsplashes and industrial pendant lights. There's a sense of effortlessness behind each one."* — **Domino**

This book showcases stunning homes that embody the perfect mix between modern and rustic. Rustic furniture in an otherwise sleek interior, rough wooden elements, a calm colour palette with a unique finish. The photos of these dream interiors accompanied by interesting stories and unique approaches will inspire you to get started yourself. In the same series as*Living in Country Style* – 9789401489973.
