Price	£35.00

- With distinctive stories, striking photography and authentic insights, this book looks into the life of local nomads

Even before the climate debate started, many nomads had already raised the questions about a simpler and more sustainable way to see the world. The desire for a decelerated life has long gripped the travel community and inspired families, solo adventurers, and outdoor fans to discover their home region. Slow movement, simple living, and sustainable travel are not just buzzwords, but rather reality which many modern explorers live.

Local Nomads is an illustrated book about adventures on your own doorstep. In this volume, adventurers from around the world share their personal stories of discovering the nature wonders close to home - and inspire you to do the same. A small adventure can feel a world away.

Text in English and German.
