Price	£6.99

- Outlines Kahlo's life and main achievements, told to the reader in an engaging first-person account
- A timeline and simple questions at the end of the book help children further understand and test their knowledge

Meet scientist Marie Curie and learn about her life and pioneering research in this engagingly illustrated biography. At a time when women weren't welcome in the world of science, Marie Curie made her mark on history. She was the very first woman to become a professor of physics in the Sorbonne, where she had studied, and even went on to win Nobel Prizes in two different scientific fields. With this fascinating biography, kids will find out how Curie, along with her husband, set up their lab and discovered both polonium and radium, and why their work on radioactivity was so important. Appealing illustrations, information on her breakthroughs and successes, and an index of major events reveal how Marie left her mark on humanity. A timeline and simple quiz help kids test their understanding and knowledge. Ages: 6 plus

Jane Kent is a writer and editor with over 15 years' experience. After studying publishing at Oxford Brookes University, she worked for some of the UK's top publishers before becoming a freelancer at JVK Creative. She works on both children's and licensed book and magazine projects. **Isabel Munoz** is a very happy and enthusiastic illustrator, raised in a small town in the north of Spain. Painting was her favourite hobby as a child, so when the time came it only made sense to study Fine Arts at university. Today, after lots of hard work and many filled sketchbooks, Isabel's proud to say illustration has become her dream job.
