Territory	World excluding Australasia, USA, & Canada. Italy and India non-exclusive
Size	305 mm x 235 mm
Pages	208 Pages
Price	£25.00

- A celebration of the raw beauty and stark majesty of the world around us
- Richly illustrated with stunning images from the world's leading nature photographers
- Pays homage to the powerful forces that shape our planet, revealing a world with extraordinary landscapes and geological features that will simply take your breath away

From searingly hot deserts to lands of fire and ice, this book is a vivid journey through the natural wonders of the seven continents. With page after page of spectacular photographs, this book pays homage to the powerful forces that shape our planet – fire, ice, water, and wind – revealing a world with extraordinary landscapes and breathtaking geological features. These images, of geysers spewing scalding water, glaciers chiselling out the mountainsides, and red-hot molten lava exploding on contact with the ocean, demonstrate how Earth's current appearance resulted from the incessant, powerful, and widespread activity of nature and climate change over the various geological eras. The portrait that emerges from this exceptional journey through vast patchwork quilts of salt deposits, colourful canyons, ripple-like sand patterns, and vibrant meltwater pools and channels, captures a living, endlessly changing, planet.

Michael Bright is the author of more than 125 books on nature, wildlife, and travel, including *Wild Caribbean*, *The Shark That Walks on Land*, *When We Became Humans*, and the international bestseller *Africa: Eye to Eye with the Unknown*. As a producer with the BBC's world-renowned Natural History Unit, he produced award-winning documentary films and radio programs, and was a recipient of the prestigious Prix Italia.
