- **Beyond simple retro imitation:** Focuses on rebirth and localised adaptation of mid-century modern design in contemporary global contexts, not just vintage copies
- **Rich real-world case collection:** Features nearly 40 completed international projects, including residences, boutique hotels, restaurants and bars
- **Cross-cultural design perspective:** Presents diversified works integrating regional materials, local aesthetics and modern living functional requirements

Mid-Century Interior Design moves beyond retro reproductions of Mid-Century Modern design, and focuses instead on the rebirth and localised application of this classic design language within a global contemporary context.

Mid-20th-Century Modernism has become a timeless classic through its rational structural logic, ergonomic comfort and warm natural materials. In today's rapidly evolving consumer culture, it is no longer merely a nostalgic trend; its relaxing and understated aesthetics resonate deeply with the living demands of contemporary people. The book features 40 fully realised projects all around the world, spanning diverse types such as residences, boutique hotels, restaurants, and bars.
