Pages	390 Pages
Illustrations	300 color
Price	£40.00

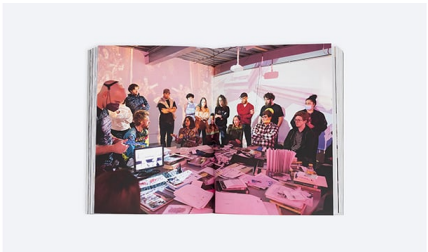

- ***ONRAMP 8*** presents SCI-Arc's 2024–25 thesis projects, documenting a new generation of architects engaging climate, artificial intelligence, material innovation, and advanced fabrication
- Designed by Jacob Witt and produced in collaboration with ORO Editions
- Features work reviewed by internationally recognised architects and critics
- Reflects SCI-Arc's leadership in AI, advanced fabrication, sustainability, and speculative practice
- Foreword by Winka Dubbeldam, Director and CEO of SCI-Arc

ONRAMP 8 captures the culminating thesis work and final projects of SCI-Arc's Undergraduate, Graduate, and Postgraduate programs for the 2024–25 academic year. Edited by Marcelyn Gow under the editorial leadership of Director and CEO Winka Dubbeldam, the publication presents a wide-ranging body of work that confronts climate resilience, artificial intelligence, advanced fabrication, and new material systems. Developed within SCI-Arc's experimental studio culture, these projects reflect the institution's commitment to critical inquiry, technological advancement, and speculative design. Richly illustrated and thoughtfully organised, ***ONRAMP 8*** serves as both an academic archive and a forward-looking survey of emerging architectural thought.

Winka Dubbeldam is an architect, educator, and Director and CEO of SCI-Arc. Founder of Archi-Tectonics, she is internationally recognised for her leadership in sustainable design, advanced technologies, and forward-thinking architectural education.

Contributors: Winka Dubbeldam, Marcelyn Gow, Kristy Balliet, Elena Manferdini, David Ruy, Liam Young, M. Casey Rehm, Jackilin Hah Bloom, Maxi Spina, Pierce Myers, Anna Neimark, Graham Harman, Thomas Heatherwick, Herwig Baumgartner, Shigeru Ban, John Cooper, Erik Gheniou, Sophie Pennetier
