- Explores the oeuvre of architect Philippe Meyer, focusing on buildings situated around Geneva and Montreaux
- Case-study led, this book illustrates a range of projects, from educational buildings to residences and villas

Transparency and solid construction both complement and depend on each other in the works of Philippe Meyer. The volume presents a cross-section of his precisely defined projects, which have been executed since 2003. They include expansive villas in the region around Geneva, the new Physics Building of the University of Geneva, and a residential building for students in Montreux.

Text in English and German.
