- Focus on a few fundamental themes of architectural research: material, presence, construction, prefabrication and the interior figure

In their office Bassi Carella Marello, the two Geneva architects focus on a few fundamental themes of architectural research: material, presence, construction, prefabrication and the interior figure. The architects reflect on those themes in a sequence of volumes within the Bibliotheca series. This second volume analyses the appearance and expression of their high-quality buildings in the Geneva region.
