Pages	208 Pages
Illustrations	400 color
Price	£55.00

- Comprehensive overview of the queer tattoo scene
- Including works by 50 international artists
- Tattoo art away from the mainstream

In recent years, having received a considerable boost by social media, a young and dynamic scene has emerged that is dedicated to what has become known as queer tattooing. This special community, which is growing steadily, has been born out of a desire to break with the hierarchies and patriarchal structures of traditional tattoo art. It aims to create safe, tolerant, and inclusive spaces where queer, nonbinary, and trans people can experiment away from the mainstream and develop their own individual styles and techniques.

In their work, many tattoo artists break free from the destructive, heteronormative, and capitalist ideals of beauty, creating a visual language that subverts the long tradition of cultural appropriation which characterises the traditional tattoo scene. Their designs reveal a unique creative flair for queer iconography.

This book is the first comprehensive introduction to this vibrant and diverse queer tattoo community. It presents 50 international tattoo artists with the help of extensive portraits, texts, and series of images.
