Current challenges in retail design, such as increasing digitisation, and the merging of online and offline platforms, have led to altogether new forms of retail and of their spatial expression. This is what this new yearbook takes a look at. It provides a current overview of innovations in multi-channel commerce, from pioneering in-store technology to new products, materials and lighting solutions at the point of sale.

More than 50 current examples of best practice, from temporary pop-up stores and avant-garde brand worlds, to hybrid retail centres, present an inspiring international cross section.
