Territory	Worldwide excluding Brazil, USA and Canada
Size	170 mm x 120 mm
Pages	448 Pages
Price	£23.00

- Presents 124 modern buildings in São Paulo, built between 1925 and 2018

Few cities have as rich a collection of modern buildings as São Paulo. Oscar Niemeyer, Vilanova Artigas, Lina Bo Bardi, Rino Levi, and Paulo Mendes da Rocha are some of the best-known names who built here. These architects, alongside many others, contributed decisively to making São Paulo a city with a unique architectural heritage and a legacy worthy of appreciation and dissemination. This guide presents 124 works built between 1925 and 2018, grouped into 12 routes laid out on sectoral maps of São Paulo, allowing readers to explore a broader area of the city and gain a deeper understanding of its scale, diversity, and complexity.

Fabio Valentim graduated from the Faculty of Architecture and Urbanism of the University of São Paulo in 1995. He is a design professor at Escola da Cidade, editorial coordinator of Editora Escola da Cidade, and a partner at UNA Arquitetos.
