Name of series	Small Steps, Big Discoveries
Price	£7.99

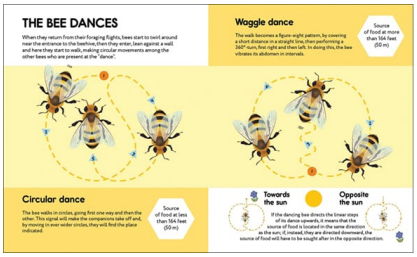

- **Science Concepts Made Simple:** Clear illustrations and accessible text guide every page
- **Part of a New Illustrated Series:** Alongside *Solar System*, *Bees* launches the *Small Steps, Big Discoveries* STEM series, which focuses on showing young readers how the world works
- **Highly Relevant School Curriculum Themes:** Introduces hot topics in the educational space, such as biodiversity, nature, and environmental awareness
- **Ideal for Reluctant Readers:** Short and accessible text alongside dynamic illustrations encourage interaction with educational (but fun!) subjects
- **Independent or Shared Reading:** The clear visual structure and approachable reading experience allow children ages 6+ to learn independently or with teachers and parents
- **Display in Schools & Libraries:** Ideal for school fairs, educational promotions, science- and nature-themed displays, and gift selections
- **Buzzy Topics:** Covers different types of bees, pollination, other pollinators, bee communication, bee dances, bee navigation, bee food, bee jobs, the importance of bees, and how to save the bees

From various bee jobs to how bees dance, ***Bees*** takes readers on a honey-sweet journey inside and outside the hive. Part of the *Small Steps, Big Discoveries* series, this buzz-worthy adventure aims to make a complex STEM concept accessible for curious readers ages 6 and up. Through vibrant illustrations and clear facts, discover the organisation, communication, and ecological importance of one of nature's most fascinating insects!

Cristina Banfi is a Natural Sciences graduate from the University of Milan, has spent over 20 years in scientific education, creating playful learning content and authoring books for National Geographic. **Elisa Varetti** is an Illustrator and architecture graduate, active across advertising, animation, and children's publishing.
