- New monograph on Boston-based architecture firm Leers Weinzapfel Associates
- Captures the essence of their unique practice since 2011 through 15 exemplary designs
- Richly illustrated with photography, diagrams, drawings, most of which published here for the first time
- With contributions by distinguished authors including Jeanne Gang, Thom Mayne, and Adele Santos

Somewhere, Something, Someone, the second monograph on Boston-based architecture firm *Leers Weinzapfel Associates* since its formation in 1982, captures the essence of their unique practice since 2011. It addresses the power of place, making, and human need in architecture and the integral link between them. In one sense, this book assumes the form of a traditional architectural monograph, highlighting a number of projects with interludes by guest contributors. In another sense, it adopts the attitude of a self-portrait: a more personal narrative that explores LWA's collaborative practice as an unfinished continuum.

Leers Weinzapfel Associates present 15 of their recent architectural projects through photography, diagrams, drawings, and supportive texts and annotations. **Somewhere, Something, Someone** functions both as the book's title and organising principle. Essays contributed by fellow architects Jeanne Gang, Thom Mayne, and Adele Santos, and conversations between members of the firm's team round off this volume.

Andrea Leers and **Jane Weinzapfel** are the founding principals of Leers Weinzapfel Associates in Boston and lead the practice alongside principals Josiah Stevenson, Tom Chung, and Ashley Rao. Committed both to practice and educating the next generation, they have collectively taught and lectured widely at institutions such as the Harvard GSD, MIT, Auburn University, and Wentworth Institute of Technology.
