- Bladh captures emotionally deeply charged pictures and scenes inducing questions on human nature, longings and needs

The book **Envoi** of the Swedish photographer and filmmaker Stefan Bladh (*1967) consists of photographs that were created on numerous trips between 2002 und 2018. In his work, in which he lets himself be driven by intuition and instinct, Bladh explores the *conditio humana*. Recurring topics are the consciousness and the impermanence of our existence.

"These pictures pose questions for me and make me think about our longings, our needs, and our nature; our notion of a separate self, even though we are so closely interwoven with one another—in every atom, since the beginning of time." Stefan Bladh
