Illustrations	250 color
Price	£68.00

- The first sustainability yearbook for architecture and design worldwide
- Innovations and trends in transformation

Forty international projects in six categories present the most innovative and forward-looking solutions, whose contribution to building culture development is clearly evident. The focus is on all the relevant themes of transformation development: use of resources, circular processes, biodiversity etc. The editors take a comprehensive look at current developments in the building sector and inspire novelty. With InteriorPark, they have been driving sustainable developments in the building sector forwards since 2010.

Text in English and German.
