Hardback

Territory

World excluding USA & Canada

Size

304 mm x 228 mm

Pages

224 Pages

Illustrations

130 color, 7 b&w

Price

£27.95

The combination of the woodcut – a print method devised early in the fifteenth century – with Johannes Gutenberg’s revolutionary invention of printing with moveable type resulted in a powerful explosion of information and ideas. For the first time, it was possible to use a mechanised system to print identical copies of books containing both text and images. Featured in *A Heavenly Craft* are the earliest surviving examples of these books from throughout Western Europe, all printed within the first century after Gutenberg’s invention. The contributors bring these rare books to life, exploring the evolution of the technique, composition and colouration of the woodcut beginning with the earliest publications. Many of the woodcut designs grew out of the tradition of manuscript illumination, in which book illustrations were painstakingly executed by hand. The authors also present the distinguishing features of national style and taste, treating the reader to examples from Germany, Italy, France, Spain and the Netherlands. In addition, *A Heavenly Craft* describes the provenance of these volumes, providing an account of how Lessing J. Rosenwald purchased them from the heir to the Lea and Perrins fortune and later donated them to the Library of Congress in Washington D.C. These early printed volumes are the predecessors of today’s illustrated books. *A Heavenly Craft* celebrates these origins, making these early publications available to bibliophiles and print lovers.

Daniel De Simone is the curator of the Lessing J. Rosenwald Collection at the Library of Congress. He was formerly the owner of an antiquarian book company and spent 25 years in the rare book trade.
