- New ideas for using your LEGO® bricks
- Ideal for beginners as well as skilled modellers
- Another book in this successful 'LEGO® Builders book series' - more than 80,000 copies sold in this series

This new volume of the successful LEGO® builders' book series addresses beginners as well as skilled builders who want to improve their building techniques and create individual and lifelike buildings, vehicles and all kinds of other fancy designs. Step-by-step instructions help the reader to come up with their own personal LEGO® masterpiece. The authors clearly demonstrate how to build 'around the corner' or put LEGO® bricks together so no studs can be seen from the outside. Furthermore, cobblestone pavement or various buildings consisting of skeleton framing elements can be created. Plenty of new modules can be built when people start using the bricks for purposes other than intended. Just start building, but don't forget: Just click – don't glue, clip or paint!
