- Binst Architects reveals their iconic standard work
- Reference work on 50 years of Binst Architects
- Technical and visual tour de force of 1250 pages
- Radically multidisciplinary: about architecture, but also interior, art integration, sustainability, design, ...

The renowned Belgian architectural firm BINST ARCHITECTS celebrates 50 years of history with **UNTITLED**, a major conceptual and analytical book that offers readers an insight into their multidisciplinary oeuvre. It offers a transparent look at BINST ARCHITECTS' renewed approach to creativity, individuality and expertise, as well as heralding a leap of innovation within the firm. The 1250 (!) page book consists of 8 complementary themes that together form the barcode against which 150 of the firm's own projects are measured. From urban planning, architecture and interior design over product development to art integration. **UNTITLED** is a reference work, a glimpse of the future and an iconic object that both in design and finish deepens the book as an artistic medium.

Binst Architects is a renowned Belgian architectural firm based in Antwerp and led by Luc Binst.
