Price	$20.00

- For as long as there's been paint, there have been women painters – you just haven't heard of them yet

For as long as there's been paint, there have been women painters – these are the painters you may not have heard of who have shaped the way we see.

From artists at the forefront of the Dutch Golden Age to avant-garde radicals in Soviet Russia and surrealist thinkers in exile, this book gathers together 65 female painters from throughout history and across the world. This highly opinionated guide will tell you everything you need to know, and nothing that you don't, about the women behind the canvas (and quite a bit about what's on the canvas too). Witty opinion is set alongside faithful color reproductions in an elegant hardback that will persuade anyone that these female painters are worth knowing about.

The first book in a new series of *Opinionated Guides* on art movements, mediums and ideas which builds on the success of Hoxton Mini Press *Opinionated Guides* to London.
