With her artistic practice, Laura Gaiser establishes fluid, collective, queer and eco-feminist narratives. Her works understand the world not from a human-centered approach, but from multiple perspectives of biodiversity. Through symbolism and juxtapositions, her authentic visual language speaks of the depth of human psychology and appeals to the subconscious of its viewers. The unspeakable, the unexpected, the desired and the undesired merge into a half-real, half-dreamed reality. Portraying non-humans, humans, animals, and species blending together mostly in public spaces, her body of work is creating contemporary mythologies.

Text in English and German.
