- Features more than 200 photographs with different styles and topics including fetishes, leather, nylon and latex
- Hardcover book with colored edges

The skin and the shape of the body are undeniably the most interesting reflectors of light and shadow. The variability of poses and the shapes of bodies are infinite and can be changed endlessly to inspire new picture compositions. For Manet, the nude was the first and ultimate expression of art. Who would contradict him? This book is an exploration of the body as masterpiece in erotic and intimate photographs by German photographer Wilhelm Tewese. Text in English and German.

Wilhelm Tewese is a German freelance photographer who specializes in nudes, erotic photographs, lifestyle, and fashion.
