Name of series	De aedibus international
Price	\$49.50

The name of this firm stands for the three Belgian architects Jan De Vylder, Inge Vinck and Jo Taillieu in Ghent. The volume presents some of their interventions to existing building constellations. These are always like surgical procedures that dissect the existing structures and then carefully complement and extend them. In this way, they create airy, often audacious figures that are confidently self-assertive.

Text in English and German.
