| **Price** | $25.00 |

This photographic collection explores some of the world's most stark, striking and unsettling buildings, from a windowless skyscraper in New York to an abandoned listening station in Berlin, eerie disused London underground stations and an experimental concrete treehouse near Rome. Spanning imposing private residences, snow-topped former Soviet monuments, dismal utilitarian structures and Brutalist architectural masterpieces from around the globe, these buildings stand united by their bold simplicity and raw, powerful presence.
