**Illustrations** 90 color, 60 b&w

Name of series De aedibus

**Price** \$44.50

- The always context-related architecture of Atelier March is presented in this volume
- With approximately 90 images and approximately 60 plans

Founded in Geneva in 2009 by François Dulon and Juan Madrinan, the always context-related architecture of **Atelier March** strives for its own identity, flexibility and sustainability. The 20-strong team has completed numerous projects in the fields of architecture, restoration, interior finishing and landscape design, a selection of which is presented in this volume: including the simple chalet in Nax (2012), which is subtly integrated into its surroundings, the restored and extended Grand-Théâtre in Geneva (2019) and an assisted living facility in Aïre-le-Lignon (2023), based on spatial sequences.

Text in French and Spanish.
