<b>Price</b>	\$64.00

Documents and illustrates 'living walls' - gardens on the side of buildings - public and private - from around the world.

Bringing nature into an urban setting is a particularly challenging part of twenty-first century urban planning and design. This book documents and illustrates wonderful examples of the solution – Plant Walls, or Green Walls as they're often called. Included are examples from airports, hotels, conference and meeting centers, and show rooms, as well as private spaces such as sitting rooms and gardens; architectural innovation at its very best.

This book shows just how wonderful combining design, nature and architecture can be.
