- New monograph on Daniel Kruger's jewelry art
- With pieces from the past ten years
- Colorful, fun, and light-hearted

Daniel Kruger's (b. 1951) new monograph **Jewellery – The unexpected meaning of curious things** presents his jewelry art of the last ten years. Kruger, who grew up in South Africa, studied at the Academy of Fine Arts in Munich and taught at the University of Art and Design at Burg Giebichenstein in Halle. He gives things an unexpected meaning. Inspired by movement and his fascination with the visual quality of materials and objects, shapes, and colors, he creates a synthesis of supposed opposites, and it is this new context that elevates these connections into something precious. Through his freedom of thought, he creates a world of objects to be contemplated, but above all to adorn the body and the human being.

Text in English and German.
