- Showcases a selection of gardens created by Michel Delvosalle between 1982 - 2020
- Beautifully bound in natural linen

This beautifully presented monograph features a selection of gardens created between 1982 and 2020 by visionary garden artist Michel Delvosalle. Passionate about nature and the harmony of landscapes, Michel Delvosalle completed his studies as a landscape architect in 1972 and has since enjoyed an extremely varied career as a garden artist, creator of spaces and atmospheres, painter, sculptor and landscape architect. Whilst each garden is unique in its setting and design, they all share the artist's signature hallmark: the search for harmony and the flexibility to adapt to places and people. Luxuriously bound in natural linen with exquisite full color photography throughout, this curated selection will inspire designers and garden fans alike.
