- Pioneers who break new ground with future technologies

The international competition for additive manufacturing and advanced technologies, the “3D Pioneers Challenge”, offers visionaries a platform with a global network. Industry leaders and experts shed light on the multi-layered fields of innovation from their own perspectives. The initiators of the platform, Simone and Christoph Völcker, thus provide an outlook and impulses for future-makers in architecture and design, research and development, as well as politics and industry – in the spirit of “pushing boundaries”.

Text in English and German.
