Reality Check shows an overview of a decade of Dutch realism in painting, photography, video, sculpture, installations, drawings and graphics. On the basis of over 50 artists – young and old, established and recently graduated – Sito Rozema – curator at Museum MORE – outlines the latest developments in realism in the Netherlands. What is it in our time that prompts the contemporary artist increasingly opt for a figurative visual language to explore reality? The catalogue, the participating artists themselves have their say: what does realism mean to them?

Text in English and Dutch.
