Price	$145.00

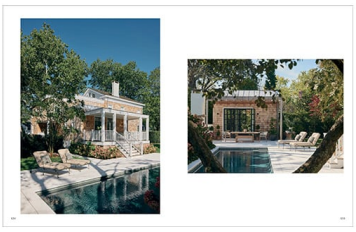

- Thirty exceptional private residences from across the world
- Each one has been built and shaped with respect for traditional craftsmanship

Traces of Time – Crafting the Authentic Home continues the spirit of *The Authentic Home* (2021). This new volume reveals thirty remarkable private residences from across the globe, each shaped by a profound respect for traditional craftsmanship and the quiet poetry of natural materials.

Within these pages, stone worn by generations, timber mellowed by light, and objects carrying the patina of life come together to form interiors with genuine presence. Every home reflects an intimate dialog between past and present, where ancestral techniques are not revived as nostalgia, but embraced as living, enduring values. The architects and designers featured here share a devotion to creating spaces with true soul—homes that move beyond fashion, resist the fleeting, and honor the beauty of what is real. Their work celebrates imperfection, authenticity, and the subtle traces left by time itself. ***Traces of Time*** invites readers into environments that feel grounded, warm, and deeply human—timeless refuges crafted with care, memory, and meaning.
