- From Stockholm to Seoul: a photographer's celebration of the world's urban geometry

Spanish photographer Andrés Gallardo Albajar has traveled the globe to capture the mesmerizing silhouettes, colorful juxtapositions and angular forms of the world's most exciting buildings. Symmetry, line, shadow and color: these photographs, taken in 20 cities across the world, provide an immersive visual tour of contemporary architecture. From Bilbao to Beijing, Stockholm to Seoul, journey through the urban geometry that forms the spatial soundtrack to our lives.

**Andrés Gallardo Albajar** is a freelance architecture and urban photographer from Spain. Despite being the son of architects, it wasn't until he got his first DSLR camera in 2012 that he developed an interest in architecture and built environments. For years Andrés has been documenting the architecture and urban life of numerous European and Asian cities, and his work has been featured in many publications and exhibitions.
