- A new perspective on fashion photographer Joachim Baldauf
- Uncover the interplay between modern photography and the classic theme of the "Walpurgis Night"
- A diverse collection of photographs made by a vast range of techniques, from analog photography via mixed reality to AI

Joachim Baldauf, renowned proponent of international fashion photography, presents a new, previously unknown side to his creative output. Inspired by Johann Wolfgang von Goethe's "Walpurgis Night" in the tragedy *Faust I and II*, his portraits, studio subjects, and outdoor themes illustrate its content with artistic freedom. Thrilling, revealing, and erotic, all leitmotifs tell their own story, complement each other, and spark the imagination. From analog photography via mixed reality to the use of artificial intelligence, Joachim Baldauf moves masterfully through a complex network of possibilities, true to the maxim "Consider What, more deeply consider How" (*Faust II,* Act II).

Text in English and German.
