- Impressive images of unique locations
- A fascinating view on the fragility of our planet
- 1000 places, 50 countries, 5 continents: adventure meets photography and art

By means of the ambitious We Drift-concept, an exhibition of 1,000,000 m<sup>2</sup>, Wim Tellier wants to confront us with our vulnerability as a human on an endangered planet Earth. Through this book, the author shows us the origin of the project, the challenges and the various unique locations. Impressive images illustrate the result of this exciting project. It is the first art installation in the world that is driven by nature.
